Child Find 2019-20 by State

This table represents each State's Child Find numbers for deaf/hard-of-hearing children reported during 2019-20 (pre-Covid).

Column one shows reported public school enrollment for the state. Column two is 3% of enrollment which is a conservative number of children with hearing loss based on what we know about newborn hearing screenings (3 per 1000 births) and what the CDC reports about school-aged children (14.9%). The last column is the reported children in each state who are listed with hearing loss.

Did you know that a minimum of 1.25 million children with hearing loss nationwide are being left behind and left out?

These kids are losing their opportunity to achieve their potential and, with each passing day, they fall further behind.

Because no one is listening.

...and these children can't hear.
